

INSTALLATION GUIDE

**2016- 2020 CHEVY TAHOE
PUSH BUMPER WRAPS
4PBFW57T15**

Pro-gard™
PRODUCTS LLC.

STRONG | RELIABLE | SECURE

**THESE COMPONENTS ARE REQUIRED
TO INSTALL THE PUSH BUMPER WRAPS**

Push Bumper Wrap System
Part # 3PBW5716-00DS and 3PBW5716-00PS

NOTE: The Pro-gard HD Push Bumper is required for the installation of the push bumper wraps.

Part # 4PBFW57T15-KIT

I. The following tools will be required to complete the installation.

- | | | |
|-------------------------|------------------|--------------------|
| A. 7/16 Socket | D. 3/4 Socket | G. 1/2 Socket |
| B. 18mm Socket | E. T-15 Torx Bit | H. 5/16 Drill Bit |
| C. Phillips Screwdriver | F. T-50 Torx Bit | I. 1-1/2" Hole Saw |

II. Read all instructions carefully and refer to the last page BOM to ensure all parts were received. *The push bumper wraps should be installed after the push bumper. Refer to the push bumper kit for instructions.*

III. Remove Push Bumper and Fascia

- A. Remove the Push Bumper and brackets necessary to remove fascia.
- B. Remove front fascia to expose the sub-frame.

IV. Install Wrap Support Brackets

- A. Fasten bracket 3PBW5716-02PS thru radiator bracket hole using 3X193 bolt, 3X13 washer and 3X170 nut. (Fig 2)
- B. Attach bracket 3PBW5716-02PS by sandwiching radiator support by maneuvering strap 3PBW5716-04 into radiator support, then and assembling washers 3X113 and bolts 3X118 and thread into strap weld nuts. (Fig 1)
- C. Tighten all the the hardware after adjusting for proper fit. Repeat on the driver side.

FIG. 1

FIG. 2

V. Modify Fascia

- Use the template on the back of the instructions to mark and cut the hole in the fascia in order to install the support brackets.
- Reinstall the fascia leaving the fender liners loose to allow access for outer bracket assembly.
- Re-mount the push bumper.

VI. Assemble Outer Bracketry

- Align the 3PBW5716-03 standoff with the slot on the 3PBW5716-02PS brackets through the hole in the fascia and the center slot on the 3PBW1200 hat channel bracket.
- Fasten the parts together using the provided 3X265 bolt, 3X508 washers and 3X165 nut as shown in figure 3 by accessing the bracket under and through the fender liner.
- Repeat on the driver side.

FIG. 3

VII. Install Wrap Assemblies

- A. Disassemble the mounting bolts at top two hole locations. It may be necessary to have someone assist you with aligning the parts.
- B. Hold the PBW5716-00PS wrap assembly along with backer plate PBW1401-PS and fasten the parts together using the longer 1-1/2" 3X212 bolts from kit, and re-use the lock washers and nuts. (Fig. 4)
- C. Repeat for opposite side.

FIG. 4

VIII. Fasten Wrap to Outer Bracket

- A. Orient the 3PBW1200 Hat Channel Brackets, as shown in Figure 5, to line up the two slots with the rivet nuts in the push bumper wraps.
- B. Fasten the brackets to the push bumper wraps using the provided 3X119 bolts and the 3X13 washers.
- C. Adjust the overall installation for fit and function of all components. Once satisfied, insure all fasteners are tight.

Installation complete!

FIG. 5

If you have any problems with this installation then call the toll free number (800-480-6680) and ask for technical assistance.
