AOI ELECTRICAL SIDE CURTAIN AIRBAG ON/OFF SWITCH

Pro-gard PRODUCTS LLC.
AOI ELECTRICAL SIDE CURTAIN AIRBAG ON/OFF SWITCH

Our patented Side Curtain Airbags On/Off Control Switches provide officers the solution to perform without the threat of damage to themselves and vehicles when their airbag is deployed. The side curtain switch protects after-market mounted equipment and uses rigid wing partition filler panels.

SIDE CURTAIN ON/OFF SWITCH FEATURES

» Highly visible, LED telltale light clearly indicates if airbag protection is turned on
» The small profile box fits easily under the dash or other confined spaces
» Key operated switches can be turned off to protect equipment mounted in the airbag deployment zone or on to protect a passenger seated behind the airbag

» Each switch is tested to 100,000 cycles to ensure quality and reliability
» Most municipal insurance plans compensate for airbag deactivation switches
» NHTSA allows vehicles used in emergency situations to install frontal airbag deactivation switches

Use rigid wing partition filler panels without the worry of them shattering from side curtain airbag deploys.
