# SAFESTOP VEHICLE ANTI-THEFT SYSTEM

## THE KEY IS THE KEY

Once the Safestop Vehicle Anti-theft System is activated, if the key is removed from the ignition, the vehicle, as well as the gun locks and trunk will be protected against theft.

## 24/7 ALWAYS ON PROTECTION

The Safestop Anti-theft System is activated through a toggle switch that can literally be turned on once and kept on for as long as the anti-theft system is installed in the vehicle, there is no need to ever shut it off.

## GUN LOCK SECURE

This feature protects your weapons mounted in an electronic gun rack from theft anytime the Safestop Anti-theft System is activated, even when the momentary switch is pressed.

## TRUNK LOCK SECURE

This feature will protect the contents of the trunk from being accessed via the factory trunk latch release as long as the Safestop Anti-theft System is activated.

Pro-gard's SAFESTOP® Vehicle Anti-theft System protects your fleet and officers with the turn of a key. Our product's **"Always On Protection"** component provides weapons, electronics and expensive duty gear 24/7 protection.

### Safestop Vehicle Anti-Theft Systems Features

- ▶ Vehicle protection is engaged once key is removed from the ignition
- ▶ The anti-theft function allows the vehicle to remain running after the ignition key is removed; with the ignition key removed, the shifter is locked
- ▶ The Gun Lock Secure feature prevents the theft of weapons stored in an electronic gun rack
- ▶ The Trunk Lock Secure feature prevents access to trunk contents
- ▶ Vehicle maintains complete functionality of most electronic operations without leaving the vehicle vulnerable to theft
- ▶ Brake Pedal Override kills the engine instantly for "Always On Protection"
- ▶ Minimal amp draw
- ▶ Low profile housing fits below the dash
